

Description

[Clear Lucite cutting tool]

DETAILED DESCRIPTION

- [0001] The cutting tool is comprised of 1/8"x4" clear Lucite. The hand torn deckle edge effected by the cutting tool exposes the natural fibers of papers.
- [0002] It is desirable for the cutting tool to be used on a work surface that does not have rounded edges. The clear Lucite tool is placed on top of the desired paper that needs the hand torn deckle edge and the paper is pulled up effecting the tear.
- [0003] The use of the clear Lucite material for this invention provides the functionality of being able to line up your tear exactly where you want it.
